PROVINCIAL WHEEL DISC

$580

c. 1850 • China • Northern Elmwood • Collection #CESR017A

W: 9.0″ D: 3.0″ H: 11.0″

This 19th-century wooden farm cart wheel captivates with simple lines and wabi-sabi textures. The expressive grain of Chinese northern elm (yumu) is on full display, beautifully aged with deep grooves and softened by a rich patina. Elevated by a custom steel mount, the wheel becomes a work of sculpture, reminiscent of a scholars' rock or ancient stone bi disc.
