NUPE VERANDA POST

$4,280

Early 20th Century • Nigeria • Wood • Collection #CJHC001A

W: 18.0″ D: 18.0″ H: 110.5″

Hand-carved with an abstract design, this tall wooden post is an architectural support beam attributed to the Nupe people of central Nigeria. Like much of Nupe art, support posts are typically carved with simple geometric forms, rather than figurative designs that depict a spirit or reflect familial histories. We're captivated by the elegant spiral twist of this minimalist sculpture and the subtle chiseled texture of the hand-carved surface.
